

MOVING UP

Congratulations to William (Bill) Martin.

Congratulations to Bill on his new role as Hotel Maintenance Manager for hotels and public buildings.

Bill began his career at Jay Peak in December of 2017 as a Maintenance Tech 1. Over the years since, he has moved through the Tech Level 2 role and into the Hotel Maintenance Supervisor role which he has held for the last couple of years. Bill has always given his best to any challenge put before him and has been a great example to the people he supervises along with his coworkers. His dedication to making Jay Peak a great place for guests to visit and to keeping things running will continue to serve us all in his new role.

Along with his current supervisory responsibilities, Bill will be taking on more management duties such as scheduling of shift coverage, time approval and coordination with other departments to manage and schedule maintenance needs. Bill will also be part of a team put together to develop better interdepartmental communication, allowing for quicker and more reliable response to company needs.

Please join me in congratulating Bill on this accomplishment.

Doug Manning

Director of Facilities
