

# MOVING UP

## Congratulations to Tony Stuart and Adam Askwith.

Please join me in congratulating **Tony Stuart** as the Department Manager and **Adam Askwith** as the Department Supervisor of our new Mechanical HVAC, Electrical & Plumbing (MEP) department.

Tony brings deep knowledge of Jay Peak's buildings, systems, history, and day-to-day operations. His ability to troubleshoot complex issues, support multiple departments, and connect the dots between electrical, HVAC, controls, and life-safety systems makes him an excellent fit to lead this department.

Adam brings strong technical experience, steady field leadership, and a practical understanding of complex resort systems. In his new role as MEP Supervisor, he will help support daily coordination, field troubleshooting, project follow-through, and the continued growth of our in-house technical capabilities.

Every maintenance department plays a critical role in keeping Jay Peak operating. Creating the MEP Department gives us a clearer structure, stronger technical support, and a better path forward as we continue improving how we maintain, operate, and care for our buildings and systems. We are excited about this next step forward for the team.

**Melian Hamel**  
Director of Facilities
